

FOR AUTHORS ABOUT THE JOURNAL

For the publication in the Physiological Journal, original articles on the main sections of physiology are accepted, as well as reviews that reflect the most urgent problems of it, papers on the history of the national and world physiological science that cover the genesis and evolution of ideas, the emergence and development of scientific schools, creative portraits of scientists, forgotten names of science, discussion articles, reviews of books and new publications, scientific chronicle, issued according to the following requirements.

Presentation and work with manuscripts

The author submits the manuscript of the paper in hard copy (two copies, together with a licensed agreement) and in electronic form.

Printed copies of the manuscript can be sent by ordinary mail (simple letter) or personally brought to the editorial office.

In electronic format, the manuscript can be submitted on CD-ROM (in case of sending by mail, put it in the envelope together with printed copies), on USB-drive (only when submitted personally!) or by e-mail as attachments.

The CD-ROM and USB-drive must be pre-checked with a reliable anti-virus program and contain only the manuscript files.

The rules for the manuscript are presented below.

Mailing address of the editorial office:

Editorial "Physiological Journal", O.O. Bogomolets Institute of Physiology. National Academy of Sciences of Ukraine, Bogomolets str 4, Kyiv 24, 01024, Ukraine

Telephone for information: 256-25-27; 253-07-45

E-mail address:

fiziol_z@biph.kiev.ua

The materials of the article - text, summary, references, legends for figures and tables - are made in one file. A separate file forms each figure. All pages of the manuscript are numbered. In addition, the text should specify where to place the drawings / tables. The format of the files for text and tables is MS Word document (doc, docx or rtf), for drawings and other illustrative material - tif, bmp, wmf, gif, jpg, eps or pdf.

On a separate page, you should provide in-

formation about the authors: surname, first name, patronymic, postal and necessarily e-mail addresses, office and home telephone numbers with the city code, mobile phone numbers. If there are several authors and they work in different institutions, it should be indicated by Arabic numerals (indices) at the end of the authors' surnames to the institutions in which they work.

The date of receiving of the manuscript is the date of receipt of the manuscript to the editorial office. In the event that an article received in violation of these rules is received, the editorial board reserves the right not to accept the article, not to criticize and not return the authors, as reported by them.

The manuscript submitted to the journal is necessarily reviewed by leading specialists in the relevant field. If necessary, the manuscript is sent to the authors for revision. After the completion of the manuscript in accordance with the comments of reviewers, the author sends it to the editor along with the responses of the reviewer within one month. The manuscript, which was not sufficiently appreciated by reviewers, is rejected as inappropriate to the profile and requirements for the level of publication of the journal.

In order to get acquainted with the edited article, the editorial staff sends an email to the author by e-mail, which must be urgently deducted, and not later than the next three days, by e-mail, inform the editorial office of any errors (indicating the page, column, paragraph, line where corrections should be made) or about their absence. At this stage of the work with the manuscript, it is not allowed to replace text, figures, tables. If the authors did not reply in time, the editors reserve the right to delay the publication of the article.

General requirements for manuscripts

The volume of experimental work with a list of quoted literature, tables and drawings with signatures, explaining the results (all on separate pages), should not exceed 15 pages (30 thousand Signs), review - 20 pages (40 thousand Signs) printed on a printer. List of quoted sources (in order of mention) for experimental work should not exceed 20 sources for reviews - 60.

Drawings, photographs, schemes, etc. can be black and white or color.

The manuscript of the article must be

signed by each author.

At the end of the article, after the list of references, the title of the article, the initials and surnames of the authors, the official names of the institutions where the work is done, the electronic address are attached. Summary and keywords in Russian and English according to the original Ukrainian text. If the article is written in Russian or English, this information is submitted in accordance with Ukrainian and English or Ukrainian and Russian.

Separate requirements for the design of the manuscript

text

Font - Times New Roman; size 14 (tables - size 10); the interval between the lines is 1.5.

Tables and illustrative material

All columns in the tables should be given a name and they should be filled with the relevant data (if the experiment was not conducted, it is necessary to put "-", and if the indicators are not set - "0").

The photo prints mark their top. On the margins of the manuscript, the location of the figures and tables should be noted.

Structure of the manuscript

UDC

Article title

Initials and surnames of the author (s)

The name of the institution where the work was performed

Email address for correspondence

Summary and Keywords

Introduction

Methods

Results and its discussion

Conclusions

Acknowledgements

Bibliography

Summary and Keywords

The summary summarizes the main results of the study.

The abstract should include the main sections:

- relevance
- statement of the problem,
- ways to solve the task,
- results,
- conclusions.

Methods

The section "Methodology" should be presented in such a way that experiments can be reproduced according to the described description of methods and reagents, experimental conditions. It is enough to give links to well-known methods to publications. It is necessary to give the names of the companies and indicate the countries producing the reagents and materials that were used in the experiments; type and quantity of experimental animals and methods of anesthesia and euthanasia are necessarily applied.

Digital results should be rounded in accordance with generally accepted rules, taking into account the average error of the experiment. The reliability of the differences in indicators should be justified by statistical analysis, referring to specific methods. Do not give the same results in tables and figures. You should also indicate with the help of which software statistical analysis of the results was made, how the results are presented, which is the confidence interval or the distribution of quantities.

All designations and names of physical and chemical units of measurement are given in the SI system.

The abbreviation of words (abbreviations), except for the well-known ones, should not be given in the tables and in the signatures to the figures (with some exceptions, in this case, by mandatory decoding them in the notes), it is also necessary, in addition to the generally accepted abbreviations, to include arbitrarily shortened short words for example, since catalase, etc.).

Results and its discussion

In this section, you should avoid directly repeating the results of the tables. Discussion of results should be limited to consideration of only the most important established facts, taking into account the preliminary data on the issue that has been studied. In other words, most of the discussion should be devoted to the interpretation of the results.

Conclusions (without title)

References. For convenient and fast processing of your work in the reference databases it is necessary to submit a list of literature in the format Vancouver Style, the description of which can be found at: http://www.nlm.nih.gov/bsd/uni-form_requirements.html
