

CONTENTS

K.I. Nikolska, G.M. Butenko. Correction of bone marrow syndrome in irradiated mice by transplantation of hematopoietic stem cells pre-incubated with thymic multipotent stromal cells	3
M.P. Fedoriuk, A.O. Cherninskyi, O.P. Maximyuk, D.S. Isaev, R.I. Bogovyk, A.V. Venhreniuk, O.M. Boyko, O.O. Krishtal. Inhibition of brain ASICs affects hippocampal theta-rhythm and open-field behavior in rats	15
A.V. Savotchenko, M.O. Semenikhina, I.V. Krasnianshchuk, R.I. Bogovyk, A.E. Honcharova, E.V. Isaeva. Behavioral consequences of enterobiasis in rats.	20
O.P. Mankivska, O.V. Vlasenko, A.V. Maznychenko, V.O. Maisky. Effect of production NO fos-immunoreactivity in the brainstem catecholaminergic neurons of rats realized motivated operant movements	26
M.S. Stupchuk, R.I. Yanchiy, T.Y. Voznesenska. Role of sirtuins in change on the functional status of oocytes and cumulus cells of female mice under conditions of the systemic immune injury	34
L.V. Natrus, P.A. Chernovol, A.V. Kopchak, V.A. Rybak, T.I. Panova. Standardization of platelet aggregation tests to evaluate condition of hemostasis	41
D.M. Nozdrenko, V.M. Soroka, O.M. Khoma. Kinetics of single contractions inhibition under ischemia-reperfusion as an indicator of m. gastrocnemius functional state in rats	50
V.V. Lomako, O.V. Shylo, I.F. Kovalenko. Transformation of erythrocytes in young and old rats' blood after the whole body cryostimulation	57
O.G. Tereshchuk, I.A. Shynchukovskiy, V.P. Nespryadko, N.S. Khrol, R.S. Palyvoda, A.V. Oleynik. Complex treatment of patients with iatrogenic occlusal disorders of the tooth-jaw system using different gnathological correction schemes	66
M.A. Bystrytska, N.V. Grygorieva, V.V. Povoroznyuk, T.Yu. Solonenko. The influence of uric acid on the bone mineral density in Parkinson's disease	74
Y.M. Anasevych, V.S. Chernov. The influence of the quercetin and the triovit on the state of the rat's small intestine with inflammation induced by carrageenan against a background of melatonin deficiency	81
REVIEWS	
V.M. Shkryl. Role of calcium ions in excitation-contraction coupling in cardiomyocytes	86
